- 180 x 200

Hybrid Pocket spring

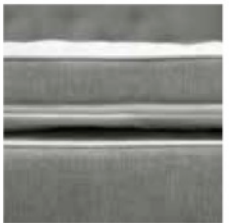

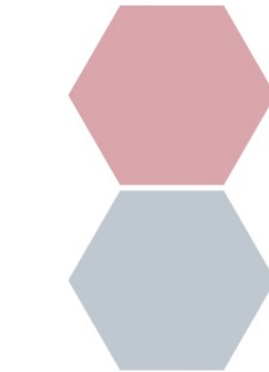

Hybrid innovative mattress appeals to people who have higher demands on mattress and have sensitive sleep pattern.

Mattress has patented double pocket system Hybrid, where there is another inner spring in every pocket spring.

Mattress appeals well to couples, when weights are not equal and both want mattress according to their needs.

Double pocket system adapts during whole night according to individual needs of the body and sleep patterns.

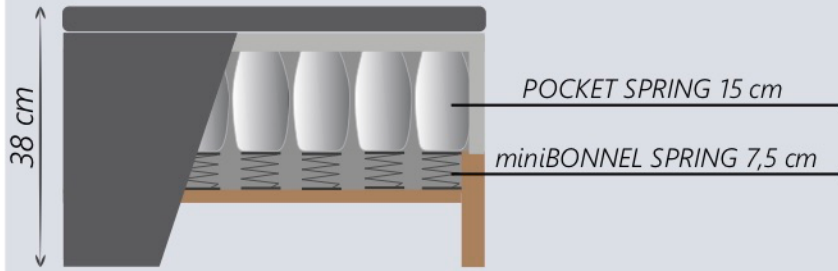

Pocket springs work strategy is as following: Outer spring supports the body with smaller weight - inner spring starts supporting as weight increases. This kind of solution ensures a comfortable sleep even for body with very big weight.

"Sleep is the golden chain that ties health and our bodies together."
-Thomas Dekker

Comfort characteristics of MLS (Multi Layer Spring Unit):

Surface softness

Soft springs that takes away unnecessary filling material.

Pressure relief

Creates the best possible pressure relief and support. Effect created by constant high preload of the coil.

Anti bottom touch

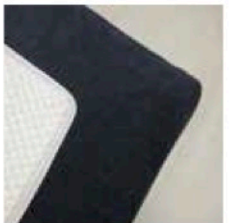

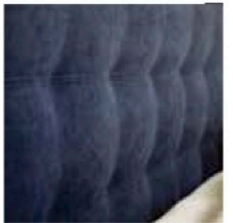

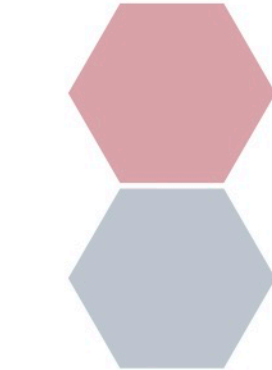

Prevents the unit from bottoming out.

Spring travel

Spring travel is essential to get the best possible pressure relief and support.

Zones

Create the best possible spine alignment and support.

"For you to sleep well at night, the aesthetic, the quality must be carried all the way through

- Steve Jobs
